DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 and 8-11 rejected under 35 U.S.C. 102(e) as being anticipated by Ciavarella et al. (D 480,639)

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Ciavarella et al. disclose, in figs. 1, 3 and 7, a collar comprising a body having a first flange and a second flange to define a clearance therebetween; one of flanges defining a notch; a bore formed in the collar and an attachment member; a hold (fig. 7), and a plurality of spaced tabs and a plurality of notches.

Art Unit: 3754

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Niada (EU 517683). Niada discloses, in fig. 1, a collar 5 comprising a body having a first flange and a second flange to define a clearance therebetween.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Devlin et al. (5,810,204). Devlin et al. disclose, in fig. 2, a collar 22 comprising a body having a first flange and a second flange to define a clearance therebetween; one of flanges defining a notch; a bore 90 formed in the collar and an attachment member (see fig. 3);

Allowable Subject Matter

4. Claims 12-15 are allowed.

5. Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to LIEN TM NGO whose telephone number is 571-272-4545. The examiner can normally be reached on Monday through Friday from 8:30 AM -6:00 PM.
